

Tonic Sol-Fa - Boston to Beijing

- I love a cappella. That said, this is one of the first a cappella albums that I've heard which combines originals and covers. Usually they are covers of others' work. The good news here is that the originals here are pretty damn good. I am in love and partial to the cover of Michael McDonald's "Takin' it To the Streets." I also fell in love with "Sleep On" and "So Easy," which seemed to pull away from traditional Doo Wop a cappella and seemed a bit more modern.

Great work, we'd love to see them in concert.
